

For our established subsidiary in the Netherlands we are currently looking for a

Field Service Engineer for our office in the Netherlands

As a manufacturer of premium measuring systems, Sympatec is known for excellent product and service quality paired with outstanding customer satisfaction. One of the keys to our success is our professional international customer service.

Your Main Responsibilities

To strengthen our After-Sales Service, we are looking for a motivated and committed professional. After a thorough training, your area of responsibility includes the commissioning and user training of the Sympatec instruments at our customers' sites. Then you take care of the systems through maintenance and repair work. You will be travelling domestically and internationally, as well as providing support from your workplace.

Your Qualifications

You have successfully completed a technical or engineering education or have comparable professional experience with a technical orientation (electronics, mechatronics, etc.). With a keen interest in complex technologies, you can tailor both equipment and software to customer applications.

Your education is the basis we build on. Whether you are a junior or professional - we rely on your commitment. Required are professional skills, motivation, customer orientation and willingness to travel with a broader view of working hours. In addition, you possess the ability to work in a team and organize efficiently, but also work independently. The position requires a valid driver's license and at least the permanent residence in the Netherlands, as well as a valid passport. Fluency in written and spoken Dutch is required. Knowledge of German or French is an advantage.

What we have to offer

At Sympatec, you will find a familiar and international culture with open, committed and highly qualified employees. You can expect a diversified and responsible full-time job in a motivated team. Our claim to set a course with innovation and quality makes for a very interesting and constantly challenging work environment. You can expect a performance oriented and competitive salary, all typical benefits, as well as the use of a personal company vehicle, commensurate with the position for a successful field service.

Are you the driven Service Engineer who wants to join our team in Benelux? Do you have a passion for high-end analytical equipment and solving technical challenges? Then don't hesitate to contact us.

Send your CV and motivation letter and tell us why you are the right candidate for this position. We look forward to hearing from you!

Sympatec GmbH was established in 1984 as a spin-off from the Technical University of Clausthal. For nearly 40 years Sympatec is pioneering high-tech instruments for particle size and shape analysis, serving a variety of applications in laboratory and process for customers worldwide.

With continuous innovations in laser diffraction, dynamic image analysis, ultrasonic extinction and dynamic light scattering (DLS), Sympatec makes a prominent contribution to the development, production and quality control of most challenging particulate systems; e.g. in Pharma, Food, Chemicals, Minerals, Powder Metallurgy.

Sympatec is represented in over 70 countries with about 180 employees in 20 offices and with qualified partners. As a technology leader we focus on innovation, quality and premium service. As an independent family-owned business we live up to our social responsibility with regional projects.

Our established office in Etten-Leur, near Breda, is equipped with its own application laboratory and supported by experienced service engineers. It offers existing and potential customers in Belgium, the Netherlands and Luxembourg professional advice and dependable support.
